Rooters' Practice at Union - 5.00 p.m.

McGILL WILL AGAIN CLASH WITH LOYOLA

National Will Meet Laval, While Vickers and Shamrock Will Clash.

TWO SERIES THIS WEEK.

McGill and Laval Will Try Conclusions Thursday Night —Parade and Smoker.

The feature of the City League series for this evening will undoubtedly be the McGill-Loyola game. The two student teams will clash between 8.00-9.00. In view of the fact that these aggregations are tied for first place in the league, this game should be a deciding feature in the winning of the league honours. The play to-night will undoubtedly be fast, as both teams will be out to sustain the position which they have attained in the league standing. McGill has been setting a good pace recently, and if the Red and White display the same form as that which enabled them to shut National out last Monday night to the tune of 5—0, they should again carry off the honours to-night. On the other hand Loyola presents a formidable opposition. Taking all things into consideration this will undoubtedly be the game of this evening's series.

The second game will be between National and Laval. This game should result in a win for the college men. However, National may have a surprise for the Laval aggregation, especially in view of the fact that Limoges will again be on their line-up.

The final event of the evening will be the clash between Vickers and Shamrock. The pace which the wearers of the green have set in their recent demonstrations, if maintained this evening, should prove overwhelming to the manufacturers.

In view of the Fuel Controller's order regarding the closing of places of entertainment on Monday, Feb. 18, there will be two City League series this week, the second of which will be played on Thursday night. The feature of this second series will doubtless be the McGill-Laval fixture. As will be seen elsewhere in this issue of the Daily a smoker will be held after the game, to which the Laval team will be invited. It is also expected that a well organized rooters' club will be in attendance on this occasion.

The following is the way in which the various teams will line up for to-night's series:

8 to 9 p.m.

Loyola.	McGill.
Goal.	
Hough	Dooner
Defence.	
Clement	Cully
Donergan	Hughes
Centre.	
Howat	Behan
Right Wing.	
Magee	Anderson
Left Wing.	
Slater	Gallery
Spares.	
Trihey	Rooney
McDonald	Rothschild
L. Clement	Ross
	Whitcomb
	Beach.

9 to 10 p.m.

National.	Laval.
Goal.	
Langevin	Chabot
Defence.	
Brunet	Dufresne
Dandurand	Guevermont
Centre.	
Godel	Laurendeau
Right Wing.	
Limoges	Masson
Left Wing.	
Brisebois	Courchesne
Spares.	
Duclos	Genest
Boiselle	Dionne
Bussiere	Plouffe

(Continued on Page 2.)

AN APPEAL TO THE STUDENT BODY.

On behalf of the hockey team we solicit your attendance at to-night's game with Loyola.

Experience has shown the value of your support in the past.

TED BEHAN, (Captain).
WALTER ROONEY, President.

ROOTERS WILL HOLD A WORK-OUT TO-NIGHT

Will Make Big Preparation for the McGill-Laval Game.

Owing to the order of the Fuel Controller regarding the closing of places of amusement on Monday, the 18th, it has been decided to play off the City League series scheduled for the evening of the 18th, this week, on Thursday, (Feb. 14th). This will mean that the McGill-Laval game will be several days earlier than was expected. In view, therefore, of the decision of the Students' Council to hold a parade and smoker in connection with the McGill-Laval fixture, it is therefore essential that immediate steps be taken in the matter of preparation for this event.

To this end, therefore, a rooters' practice is called for this afternoon at 5 o'clock, in the Union.

"Dan" Sutherland will be on hand to lead the cheering, and it is hoped that the Glee Club will lend their assistance in making the Rooters' Club a feature of the clash between McGill and Laval.

The representatives on the Students' Council from the various faculties will act as chief marshals for their respective sections of the parade, while the class presidents will marshal their various classes. Tickets for the game must be obtained before leaving the Union next Thursday evening. The class presidents of the various faculties will each be furnished with a supply, and from them members of the respective classes may purchase their tickets early in the week.

In the meantime it is "up to" the undergraduates to turn out and display some real enthusiasm in connection with rooters' practices. This afternoon at 5 o'clock. All up for a brisk snappy workout. Something by way of clearing the lungs for the big test when we face the Laval rooting aggregation.

This should be the event of the season, and will undoubtedly be a huge success if it is accorded the whole-hearted support of the student body.

On another page of this issue will be found a number of the songs which will be used at these rooters' practices. Bring these copies along with you this afternoon.

Further particulars regarding the actual programme for Thursday evening will appear in a later number of the Daily including details as to the entertainment at the Union which will follow the game.

Lavallee.

10 to 11 p.m.

Can. Vickers.	Shamrock.

(Continued on Page 2.)

COL. BIRKETT ARRIVED HOME ON SATURDAY

Invalided Home After Three Years in France.

"DAILIES" APPRECIATED

Hopes to Meet Students of "Old McGill" In Near Future.

Colonel H. S. Birkett, of the McGill General Hospital in France, and Dean of the Faculty of Medicine, returned to Montreal Saturday.

The first question Col. Birkett asked the Daily representative who interviewed him last night was: "How is the Daily getting along"? He stated that the McGill Daily was in great demand in the Hospital. It is the only news of McGill, with the exception of odd items, which McGill men overseas see, and is read by all.

"When everyone has read it," said Colonel Birkett, "the Daily is all used up." He suggested that in future, copies of every issue be sent to the McGill Hospital, and it need not be said that we will see that the suggestion is acted upon.

On entering Dr. Birkett's office we noticed a number of war trophies, including a German helmet, on the desk, and there the corner was a large box and kit-bag, both well marked with a red and white band.

This is the way Col. Birkett marks his baggage. The red and white is always recognizable.

Col. Birkett landed in France with one hundred and eighty-six men of other ranks, and thirty-six per cent. of medical students. Forty-three per cent. of the original unit left with commissions soon after landing in France. Of the medical students 9[illegible] per cent. have received commissions. From the beginning the unit distinguished itself. The conduct of the men was wonderful. Not a single "charge sheet" was brought against any member of the hospital. This so pleased the Commandant of the district that he asked Col. Birkett to parade the unit, and told the men he was proud to be able to say that they were the only unit in France to have such a record. In Col. Birkett's opinion this was altogether due to the students and their influence on the rest of the men. The enthusiasm shown was wonderful. When landing at Boulogne 42 tons of freight were landed in 24 hours. McGill athletes had a hand in this. Many of the students left the medical service for the fighting units; these included Lieut. L. C. Montgomery, who has since received the Military Cross. Those students who were sent back to Canada to complete their courses have all done wonderfully well. Fifteen men of the fourth year left France on Sept. 31st, 1915. Eleven men of the third year also returned, and of these two became surgeon-probationers in the Royal Navy. Five have recently obtained commissions in combatant forces. Four men of the second year joined the fighting ranks, and four joined the Royal Naval Reserve as surgeon-probationers. Of the first year three men joined the combatant forces, and four received commissions.

There are only three men of the first year left in the unit, and the same number of second year men. A few came back and were sent out on Field Ambulance work. Those also who received commissions in the Canadian Army Medical Corps returned to the original suit as officers. There were three of these.

The McGill (No. 3) General Hospital has a capacity of 2,010 beds, which is seven times as large as the Royal Victoria or General Hospital of this city. The buildings are merely huts, with the exception of the old Jesuit College, which was partly destroyed by fire in 1907. These huts are built of wood, with corrugated iron roofs. The whole hospital covers more than twenty-six and a half acres.

Col. Birkett has some splendid photographs, which describe best of all

APPLIED KNOWLEDGE.

One of the most important objects of a student who later hopes to become a man of distinction should be to cultivate the habit of taking an interest in public affairs. Just as modern conditions and the minutest division of labor have raised the huge social problem of keeping labourers from becoming machines, so in a University there is a strong tendency drawing the students towards a life of hermit-like seclusion and concentration on remote academic researches. University ideals have undergone a great change since the old days when a wide knowledge of Latin and Greek was the essential ornament of men of learning.

The modern scholar has in mind a much more practical object in life. He wishes to set an example to his less fortunate fellows, and to advance society to a higher moral tone, but not by writing books, which only a few can read, and fewer enjoy and understand. He has learned that the way to improve society is to reach the multitude and build from a solid foundation.

There is a great work for the coming generation to do. A work which will appeal to all, and will tax the resources of the nation to the utmost. Every branch of human knowledge should apply to practical life, for only in this way can anything be done. The objects of a University should be the betterment of mankind, and not the encouragement of polite learning. When the Social Sciences were in their youth they were of no benefit to the world because they were not applied.

The words and theories of Plato and Socrates undoubtedly influenced the clique at Athens, and improved the tone of later scholastic effort, but they could be of no value to society until they were used, and as an ideal in a conscious effort to better social conditions. The same can be said of the ancient mathematicians and astronomers.

The discovery of the magnetic needle was of little practical benefit until some bright scholar bestirred himself and invented the mariner's compass, thus revolutionizing commerce, and leading to the discovery of new lands across the seas.

If Universities encouraged a more utilitarian spirit among students they would be more appreciated by the public at large. Knowledge may be an end in itself, but if not used for the improvement of the race, it becomes a selfish object, and should not be the aim of an educational institution.

COLONEL BIRKETT.

The work which Colonel Birkett has done in France deserves more than a passing comment. It has been chiefly owing to his efforts that No. 3 General Hospital has won such a glorious name in a strange land. The description contained in other columns of this issue is necessarily brief, but it suffices to show that the spirit of McGill accompanies her sons wherever they go. Long before Col. Birkett went overseas he had made a name for himself in his profession, and his success in France was no more than was expected of him. The splendid tribute he pays to the McGill students who have given up everything to serve their country is indeed something to be proud of, and when the story of Canada's part in the war is finally completed, their efforts will receive due reward. We welcome Colonel Birkett back to McGill, and thank him for the fame he has brought McGill overseas.

YALE NOW ADVOCATES REGULAR VARSITY SPORTS

Idea is to Have Harvard and Yale Adopt System Like West Point.

NEW HAVEN, Conn.—There seems to be a growing demand at Yale University for a return to regular varsity athletic competition this spring. Yale has been having a little "informal" varsity athletics with freshman competition much along the lines of normal years. The varsity basketball and swimming teams are competing as usual this winter; but those are minor sports, and attention is now being directed to the establishment of major varsity sports with baseball, track and crew squads this spring.

The Yale Daily News, which is generally recognized as the official paper of Yale undergraduates, has turned its attention to this situation, and in an editorial published last week voices the sentiment that the University athletic authorities change their views and give the athletic associations more intercollegiate sport.

It is the opinion of the News that Yale should take part in varsity competition, during the war, along the lines adopted at West Point, where practice is restricted and running expenses cut down to a minimum. The News maintains that if through lack of practice or candidates the University teams should lose every game, the more glory would come to Yale men in the service of their country. The editorial says in part:

"The 'informal' system as originally practiced by Yale, Harvard and Princeton, though well meant, has been widely censored as not furnishing the necessary incentive for athletics. For the University to 'about-face' now, acknowledge that she was wrong and begin anew, will be no disgrace. It is the only logical step open.

"That the University in her complete abolition of major sport teams has been in the wrong, it is useless to deny. It is hoped that those in control will be broad-minded enough to realize the mistake before spring, and that we shall again have a baseball nine, a track team and a crew representing the University and taking part in outside contests under the West Point system.

"The spotlight now rests quite naturally on Yale and Harvard, among the larger institutions the only remaining advocates of the 'informal system' alone opposed to big games at this times. Will there now be a new expression from those two institutions of their views on the matter? Athletics of the stamp advocated by Secretaries Daniels and Baker and by the Intercollegiate Athletic Association do not call for a return to the glamor and expense of the old regime. Briefly they advocate a system somewhat similar to that in use at West Point, minimize running expenses, little practice and a team that represents the institution and which plays numerous outside games with teams."

TAKE HER TO THE GAME.

R. V. C. NOTES.

The usual Bible Study Class will be held this afternoon, at 4 o'clock, in Room 2 of the R. V. C.

"Principles of Political Economy," by John Stuart Mill, has been missing from the R. V. C. Library since Jan. 16. Will the student who has this book kindly return it at once, notifying the secretary of its return.

There will be an important meeting of the R. V. C. Partial Society to-morrow, at 10 a.m., in the Common Room of the R. V. C.

Mr. Geo. Adam will deliver an address entitled, "With Harry Lauder at the Front," to-morrow, at 8.30 p.m., in the Ritz-Carlton Hotel. Tickets are $1.00, and may be obtained at the Ritz-Carlton or at the R. V. C. The proceeds are to be in aid of the War Work of the McGill Women's Union.

LOST.

A Waterman's self-filling fountain pen, between the Redpath Library and the Arts Building. Finder please return to the Janitor of the Arts Building, or to the R. V. C.

HOCKEY PRACTICE.

As the hockey match with Macdonald is to be played on Wednesday, there will be a practice to-day. Watch the notice board for the time.

A JUSTIFICATION OF FINALS.

Theoretically, there is no justification for the existence of final examinations in colleges. Theoretically, the student enters the school with an intense desire for knowledge, which he gains under the guidance of instructors; he is determined to master every part of his course; and he follows his resolution throughout the years of his attendance. He is his own master to take or leave as he chooses; if he leaves something behind, the loss is his. The college is but an aid; a sort of Baedecker's to call his attention to the important points in the tour through the fields of knowledge. And does one feel responsible to that worthy compiler if, on a pleasure trip, he neglects a cathedral or a lake?

This is the theoretical, as it is the proper attitude of the student. I think it is that of almost every one who finds himself about to enter a University. Many there are who keep the faith, who master each day's lesson; to these the opportunity to give something out is a pleasant rest from the never ending effort to take everything in. How about the other and greater part — those who occasionally lose sight of the gleam and fail to grasp the divers gems within their reach? To these the examination is a helpful stimulant, whether they like it or not—like certain herbs, bitter but effective. To no one is it the outrage it is sometimes represented as being; no one need fear serious nervous or mental derangement on account of it. And we may be certain that many an alumnus feels a debt of gratitude to the old enemy of his college days, the final. I know that recent concentration upon History, incited by fear of the final, has given me a better insight into that course than I should otherwise have.

All this has no personal interest for the instructor, except as it may reflect his altruism. But nevertheless, the attitude cited as the proper one for students does not reflect the position of the faculty, the regents of the administrators of a University. They are more than volumes of Baedecker. They owe a duty to the state, which they represent, to render men and women as fit as they are able for the performance of the duties of citizenship. True enough, if a person lacks the initiative power to learn of his own volition, his value as a citizen is not great. But he will be the better for some knowledge. And experience shows that this end is in part attained by the use of finals. Even if the information is not retained, the student, in his efforts, has gained experience in the art of studying.—Minnesota Magazine.

CLASSES FOR WOMEN POPULAR.

NEW YORK, N.Y.—Three hundred and fifty courses, 145 of them in the School of Commerce, are now open to women in New York University. The women's law class which has no connection with the School of Law, but is said to have been the opening wedge to the admission of women to the bar of New York State, some 25 years ago, is very popular, and also the new class in practical politics for women.

LONDON, England.—The Board of Trade have awarded a piece of plate to Capt. Armand Charvin, master of the French steamship Pacifique, of Marseilles,, in recognition of his services to a shipwrecked British crew, whom he rescued in June last.

TAKE HER TO THE GAME.

EXAMINATION RESULTS IN ZOOLOGY OUT

List of Successful Candidates at Last Announced.

LARGE NUMBER PASSED.

Medicine Freshmen are Now Engrossed in Mysteries of Anatomy Course.

The Zoology results, in first year Medicine, which have been anxiously awaited for some time, have at last appeared. The pass list is a very creditable one, and one that the class should be proud of. This examination is the last final the Medicine freshmen have until the end of the term, and great relief is expressed on all sides to-day.

The first year men have now left the dog-fish and rabbits to rest, and are probing in the mysteries of anatomy. The results, as compiled by the Faculty, are as follows:

HONOURS.

1—C. N. Griffin.
2—Ernest Dickey.
3—H. B. Breitman.
4—J. M. Baxter, B.Sc.
5—C. F. Fluhman, B.A.
6—B. Benjamin, B.A.; J. G. Copeland; S. S. Wittenberg, equal.
9—H. Lipsey.
10—E. H. Adams.
11—M. C. Childs, B.A.
12—K. Druckman, B.A.; xJ. N. Petersen; C. T. Potter.
15—J. S. Hynes.
16—xN. B. Freedman.
17—J. M. Boyd, B.A.; S. Goldman, equal.
19—G. A. Boon.
20—A. Davis; M. Markovitch; J. T. Ryan; O. Smith, B.L., equal.
24—I. E. Brouse.
24—C. Drabkin; L. D. Irwin, B.A.; H. Katzman; H. Shapiro.

Pass List.

E. H. Adams, E. J. Bassen, J. M. Baxter, B.Sc., B. Benjamin, B.A.; J. Block, J. A. Boon, J. M. Boyd, B.A.; H. B. Breitman, I. E. Brouse, Chas. Buckman, M. F. Cashin, M. C. Childs, B.A.; C. H. DENTAL UNDERGRAD. HELD MEETING

Dr. D. P. Mowry Read Paper on "Esthetics of Prosthesis."

The regular monthly meeting of the Dental Undergraduate Society was held at 8.15 p.m. last Friday evening in the New Medical Building. After the minutes had been read and duly adopted, the president called upon the speaker of the evening, Dr. D. P. Mowry, to deliver his paper.

Dr. Mowry read a very interesting paper on the "Esthetics of Prosthesis." During the course of his paper, he showed that the duty of the successful prothesist is not merely to restore lost dental organs for the purpose of mastication. He must at the same time make the restoration in such a manner that it will harmonize with the features of the individual.

At the conclusion of Dr. Mowry's paper, the president thanked the speaker for his paper.

At the business meeting which ensued it was decided that the next monthly meeting would be held in the form of an informal dinner. Several members of the society will read papers during the course of the dinner.

R. V. C. WILL BE THERE.

Information has come to the Daily through indirect sources that the R. V. C. students will be out in strength to witness to-night's hockey game. Although this is only a rumour which has fallen upon our ever-open ears, we have every reason for believing it to be true. A good representation of R. V. C. students in the rink would be appreciated by the team.

TAKE HER TO THE GAME.

"LET'S WIN THE WAR."

WAR MENUS.

How to Save Wheat, Beef and Bacon for the men at the front. Issued from the Office of the Food Controller for Canada.

MENU FOR MONDAY.

Breakfast.

Cornmeal Mush
Toasted Brown Bread — Honey
Tea or Coffee

Dinner.

Meat Pie with Potato Crust
Baked Onions
Caramel Pudding

Supper.

Macaroni and Cheese — Chili Sauce
Baked Apples
Oatmeal Muffins — Tea

The recipe for Oatmeal Muffins, mentioned above, is as follows:

Oatmeal Muffins—

1 cup cooked oatmeal
1½ cups flour
½ cup milk
1 egg
2 level tablespoons sugar.
2 level tablespoons melted butter substitute
4 level teaspoons baking powder
½ teaspoon salt.

Mix and sift flour, salt and baking powder. Add half the milk and the egg well beaten. Mix the remainder of the milk with the cooked oatmeal and add to the dry ingredients. Beat thoroughly, then add melted butter. Bake in greased gem pans.

(Wheat and meat saving recipes by Domestic Science Experts on the staff of the Food Controller's Office.)

COL. BIRKETT ARRIVED HOME LAST SATURDAY.

(Continued from Page 1.)

the appearance of No. 3 Hospital. In one, an interior view of a hut, a number of wounded Tommies are seen playing a game on the floor, while the occupants of the beds are amusing themselves in various ways. A neatly uniformed nurse stands in one corner. A single small stove is the only heating apparatus. Another view shows the officers' tents forming a little colony by themselves. Opposite them is the football field, where the McGill men have kept up their traditional love of sport. They have actually made many of the British soldiers enthusiastic baseball fans, and large crowds turn out to witness the frequent games. Football, cricket and even tennis are also played. The cricket did not take so well as the other two, but tennis is very popular. The courts were made by the McGill men in their spare moments. Col. Birkett said he always encouraged sport. He has found that it puts enthusiasm into the men. The officer who looks after the comfort of those under his command gets willing work in return. A number of the officers in the McGill unit were boxers, and this sport also proved very popular. Another photograph showed a beautiful wooded path where three soldiers were conversing with a nurse. But as a rule the British Tommies prefer to sit down beside the dusty road. His experiences of woods at the front have been far from pleasant, and this explains such a strange preference.

Col. Birkett is having a number of magic lantern slides made in England, which will be something for the public to look forward to.

Between Aug. 1, 1915, and the end of 1917, No. 3 Hospital has treated 94,320 patients, and has only had a death rate of one half of one per cent. There have been 7,601 operations, with a post-operative mortality of only 2.8 per cent. Col. Birkett says this is due to the splendid physical condition of soldiers compared with their civilian condition. One recent feature of the hospital was the regulation which compelled all cases of compound fracture of the Femur to be treated to a conclusion before being sent to England. The result of this was that in five months (July to November), of 78 cases of compound fracture of the Femur, 35 were treated to such a stage that they were fit to travel. This is considered as a very good result. The wounds received at the front depend to large extent on the mode of fighting. Thus cases of compound fracture of the Femur are usually caused by machine gun fire. The Germans are very expert at concealing machine guns in pill-boxes and in shell craters.

There are comparatively few patients in No. 3 Hospital who are actually McGill students. But all are loud in their praise of the treatment they receive.

Col. Birkett stated last night that it was impossible to predict his future movements. He was heart-broken at leaving his "child," as he calls No. 3 Hospital, and feels that his duty lies in France. But medical consultants in both England and France have forbidden his return even to England after his serious illness, and he is back to Canada for good. He hopes that the Canadian Government will utilize his experience obtained in France for the benefit of returned soldiers. But in any case, he is looking forward to meeting his McGill friends and the student body.

NIGHT CLASSES IN ENGINEERING.

Night classes in engineering work have been started by the University of Arkansas in Little Rock. Work is offered in steam engines, boiler, internal combustion engines, mechanical drawing, elementary mechanics, dynamo and electrical machinery and wireless telegraphy.

TAKE HER TO THE GAME.

The Royal Military College of Canada.

THERE are few national institutions of more value and interest to the country than the Royal Military College of Canada. Notwithstanding this, its object and the work it is accomplishing are not sufficiently understood by the general public.

The College is a Government Institution, designed primarily for the purpose of giving instructions in all branches of military science to Cadets and Officers of the Canadian Militia. In fact, it corresponds to Woolwich and Sandhurst.

The Commandant and military instructors are all officers on the active list of the Imperial army, lent for the purpose, and there is in addition a complete staff of professors for the civil subjects which form such an important part of the College course. Medical attendance is also provided.

Whilst the College is organized on a strictly military basis the cadets receive a practical and scientific training in subjects essential to a sound modern education.

The course includes a thorough grounding in Mathematics, Civil Engineering, Surveying, Physics, Chemistry, French and English.

The strict discipline maintained at the College is one of the most valuable features of the course, and in addition, the constant practice of gymnastics, drills and outdoor exercises of all kinds, ensures health and excellent physical condition.

Commissions in all branches of the Imperial service and Canadian Permanent Force are offered annually.

The diploma of graduation is considered by the authorities conducting the examination for Dominion Land Surveyor to be equivalent to a university degree, and by the Regulations of the Law Society of Ontario, it obtains the same exemptions as a B.A. degree.

The length of the course is three years in three terms of 9½ months each.

The total cost of the course, including board, uniform, instructional material, and all extras is about $900.

The annual competitive examination for admission to the College, takes place in June of each year, at the headquarters of the several military districts.

For full particulars regarding this examination and for any other information, application should be made to the secretary of the Militia Council, Ottawa, Ont., or to the Commandant, Royal Military College, Kingston, Ont.

YOUR PRESCRIPTION OUR ACCURACY

Quality is one thing, accuracy another. The best of drugs imperfectly put together may prove a harm rather than a help. We guard the accuracy of all prescriptions. Our weighing and measuring utensils are of the highest type of perfection, always accurately adjusted, always carefully manipulated. If you want accuracy, we can put it into your prescription.

PROVINCE OF QUEBEC

DEPARTMENT OF COLONIZATION, MINES AND FISHERIES.

The chief minerals of the Province of Quebec are Asbestos, Chromite, Copper, Iron, Gold, Molybdenite, Phosphate, Mica, Graphite, Ornamental and Building Stone, Clays, Etc.

The Mining Law gives absolute security of Title and is very favourable to the Prospector.

MINERS' CERTIFICATES.

First of all, obtain a miner's certificate, from the Department in Quebec, or from the nearest agent. The price of this certificate is $10.00, and it is valid until the first of January following. This certificate gives the right to prospect on public lands and on private lands, on which the mineral rights belong to the Crown.

The holder of this certificate may stake mining claims to the extent of 200 acres.

WORKING CONDITIONS.

During the first six months following the staking of the claim, work on it must be performed to the extent of at least twenty-five days of eight hours.

SIX MONTHS AFTER STAKING.

At the expiration of six months from the date of the staking, the prospector, to retain his rights, must take out a mining license.

MINING LICENSE.

The mining license may cover 40 to 200 acres in unsurveyed territory. The price of this license is Fifty Cents an acre per year, and a fee of $10.00 on issue. It is valid for one year, and is renewable on the same terms, on producing an affidavit that during the year work has been performed to the extent of at least twenty-five days' labor on each forty acres.

MINING CONCESSION.

Notwithstanding the above, a mining concession may be acquired at any time at the rate of $5.00 an acre for SUPERIOR METALS, and $2.00 an acre for INFERIOR MINERALS.

The attention of prospectors is specially called to the territory in the North-Western part of the Province of Quebec, north of the height of land where important mineralized belts are known to exist.

PROVINCIAL LABORATORY.

Special arrangements have been made with the POLYTECHNIC SCHOOL of LAVAL UNIVERSITY, 228 ST. DENIS STREET, MONTREAL, for the analysis of minerals at very reduced rates for the benefit of miners and prospectors in the Province of Quebec. The well equipped laboratories of this institution and its trained chemists ensure results of undoubted integrity and reliability.

The Bureau of Mines at Quebec will give all the information desired in connection with the mines and mineral resources of the Province, on application addressed to

HONORE MERCIER,
Minister of Colonization, Mines and Fisheries, Quebec.

Rooters' Club Songs

The following are the songs and parodies which are to be employed by the Rooters' Club on the occasion of the game Thursday night with Laval. Students are advised to cut out the songs reproduced and to keep them for future reference.

I.—TUNE: "PUT ON YOUR OLD GREY BONNET."

Put on your red and white sweater,
For you have none better,
And we'll open up another keg of beer.
It is not for knowledge that we come to college,
But to raise H—— all the year.

II.—TUNE: "MY LITTLE GIRL."

We're from McGill, dear Alma Mater,
And we're ready for the fray,
We'll show how to trim the Frenchies,
When they try to stop our play.
We know a glen behind the mountain,
Where we'll send them if they do,
Poor old Laval, we've got your number,
And we'll make it hot for you.

III.—TUNE: "WHAT'S THE MATTER WITH FATHER."

What's the matter with Rooney, he's all right.
What's the matter with Behan, he's all right.
Now all you fellows from old McGill,
Cheer that team till their hearts do thrill,
What's the matter with our team,
They're all right.

IV.—TUNE: "TAMMANY."

James McGill! James McGill!
Peacefully he slumbers there,
Blissful though we're on a "tear."
James McGill! James McGill!
He's our father; well, yes, rather,
James McGill.

V.—TUNE: "JOAN OF ARC."

Old McGill, old McGill,
Now our men once again take the ice,
Can't you see the good old red and white?
Can't you see we're going to win to-night?
Old McGill, old McGill,
Let your spirit guide us through.
We're going to win the victory,
Old McGill, we will cheer for you.

VI.—YELL.

We got you—we got you,
We got you, Frenchie dear;
We'll shout and fight for the red and white,
But drink your health in beer.
Aripady, arapidy, aripady rapady ri,
We got you, we got you,
We got you, ah, bien oui!

VII.—TUNE: "WHERE DO WE GO FROM HERE."

Why are we here to-night, boys,
Why are we here to-night?
We're here to down Poor Old Laval,
And hoist the Red and White
Upon the pole of Victory,
Where it should be by right.
Oh, yes boys, that's why, we are all here to-night.

VIII.—YELL.

We're out for gore!
We're out for gore!
We're out for gore!
Keep her low,
Keep her low,
Keep her low,
Let 'er go,
M-c-G-I-L-L.
What's the matter with old McGill,
She's all right, oh, yes, you bet,
McGill, McGill McGill.
Rah! Rah! Rah!
Rah! Rah! Rah!
Rah! Rah! Rah!
McGill.

IX.—TUNE: "YOU OUGHT TO BE."

You ought to be, you ought to be, you ought to be,
At old McGill boys.
Where the Red and White are in the fight,
Morning, afternoon and night,
You ought to see, you ought to see, you ought to see,
Our team rip through them,
You can tell the world the cup comes to
Mc--G., we all know how to spell it,
Oh, we're going, you bet we're going, yes, we're going to win to-night.

X.—TUNE: "WE'RE GOING TO THE HAMBURG SHOW."

There's a team that's going to win to-night,
That will bring McGill to fame and glory bright;
And our dear old Red and White,
Will soon be champions quite,
For we're going to lick Laval to-night,
Poor Laval — Poor Laval.
For their team will be a sad and sickly sight;
Poor Laval — Poor Laval;
For we're going to lick their team to-night.

XI.—TUNE: "PRETTY BABY."

Oh! we've got a dandy team, and they are playing very good,
For McGill Boys, Old McGill boys,
They'll play rings around Laval, as though they were but chunks of wood.
For McGill Boys, Old McGill Boys,
For they represent a college that is famous o'er the world,
As will be easily seen,
'Cause it's sons are always helping and arooting in the game,
Umm, Umm, for the Red and White team.

XII.—TUNE: "ALLOUETTE."

Oh, Laval, we will get you yet.
Oh, Laval, we will trim you fine,
We will wish you all the luck,
When we rid you of the puck,
And your grit, and your spunk, and your gall, Oh——
Oh, Laval, we will get you yet,
Oh, you bet, we will get you yet.

XIII.—TUNE: "THERE'S A QUAKER DOWN," ETC.

Oh, the red and white,
Will win to-night,
We'll show them how to play,
We're here to turn the trick,
They'll feel so sick,
For our men know the way,
When old McGill
Is in the fray,
The Frenchies stay, so still.
And after we have got their fleece,
We'll let them rest in peace,
And give a hearty cheer for old McGill.

XIV.—LAVAL YELL.

Chickalacka, boomalacka,
Boom, boom, boom,
Chickalacka, boomalacka,

Bah, bah, bah,
Laval.

WAR WORK IN METALLURGY.

(Continued from Page 4.)

ly to the interest he would take in metallurgical studies.

The next meeting of the Association will be held on Wednesday evening at 8.15, in the Chemistry lecture theatre, and a paper on "The defects in Steel Ingots and Forgings," will be presented by Mr. A. Gordon Spencer and Mr. S. W. Werner. The subject is of vital importance for the production of sound steel for shell making, and the authors have made a special study of the subject.

Mr. Spencer is a consulting metallurgist, having a considerable experience in munition work; and Mr. Werner, Lecturer in Metallurgy, has for the last year or two spent much of his spare time on the microscopic examination of steel and the investigation of many problems in the practical production and working of shell steel. No one who has not made a special study of the subject can realize how many and serious are the difficulties which present themselves to the firms who are engaged in making and working steel for munitions, nor of the extent to which these difficulties are being solved by the scientific use of the microscope and the pyrometer. I trust that all students who have any interest in the production or use of steel will make a special point of attending this meeting.

FIRST YEAR DENTISTRY.

Results of Examination in Zoology.

HONOURS.

1—J. Weiner.
2—E. A. Kutzman.
3—S. Fuerst and M. Ratner, equal.

Pass:—A. S. Auclair, B. Bernfeld, S. Fuerst, E. Goldwater, A. I. Handelman, B. L. Hyams, E. A. Kutzman, M. Ratner, L. Shklar, N. Solomon, A. A. Swancesky, G. S. Veith, J. Weiner.

ILLINI IN FRANCE COLLECT RELICS

Everything from a French machine gun to a fork and spoon used by the German soldier is included in an exhibit of war relics at Illinois University, collected by Illinois men in the war zone. The exhibit will continue for several days, after which it will be placed in a permanent position in one of the university buildings. It will be added to from time to time by the collections of Illinois men at the front.

RECIPE FOR GERMAN KULTUR.

Take a bit of Turkey and roll it in crumbled cathedrals. When this is sizzling well, add a lot of wild oats, drop in quantities of poached property and scrambled retreats. Break an oath in it and stir with cold steel. Add enough blood to give the proper thickness, turn on the gas and heat the whole red-hot with liquid fire. When it is done, garnish with cracked hearts and drop bombs on, and you have a dish fit for William and other Hungary people. — Harvard Lampoon.

TO-NIGHT'S THE NIGHT!

NOTICES

METALLURGICAL ASSOCIATION.

The regular meeting of the Montreal Metallurgical Association will be held at 8.15 p.m. on Wednesday, the 13th, in the Macdonald Chemistry Building. The paper for the evening will be presented by Mr. A. Gordon Spencer, and Mr. S. W. Werner, on "Defects in Steel Ingots and Forgings." This paper will give the results of a series of interesting experiments. All are cordially invited to be present.

CIVIL ENGINEERS TO MEET.

There will be a meeting of the Canadian Society of Civil Engineers on Thursday, the 14th, at 8.15 p.m. The speaker will be Alfred Stansfield, D.Sc., F.R.S.C., A. Can. Soc., C.E., Birks Professor of Metallurgy, who will give a paper on "Recent Advances in Canadian Metallurgy."

The meeting is open to friends of corporate members.

MANDOLIN CLUB PRACTICE.

The Mandolin Club will hold a practice to-night, in preparation for a prospective trip to Macdonald College. The practice will be held at Peate's Studio at 7.30, and all members are urged to show up.

GLEE CLUB NOTICE.

The Glee Club will hold a practice in the Union at 8 o'clock to-morrow (Tuesday) evening.

MILITARY LAW LECTURE.

Capt. McDougall will give the first lecture on Military Law in the "A" Certificate Course in Room 33 of the Science Building at 8 o'clock to-night. As no Military Law lectures will be given at the Tuesday afternoon lecture periods, all students taking the course must attend. The next lecture in Military Law will be given on Monday, the 18th, at the same time.

WHAT'S ON.

TO-DAY.

4.00 p.m.—Bible Study Class at the R. V. C.

8 to 9 p.m.—McGill vs. Loyola at Victoria Rink.

8.00 p.m.—Military Law lecture, in Engineering Building.

8.15 p.m.— Philosophical Society meeting at Strathcona Hall.

COMING.

Feb. 12.—Meeting of R. V. C. Partials.

Feb. 12—Rev. Geo. Adam on "With Harry Lauder at the Front."

Feb. 12.—First Inter-Faculty basketball game, Medicine vs. Theology.

Feb. 13.—Macdonald vs. R. V. C. at hockey.

Feb. 15.—Y.M.C.A. - Y.W.C.A. Skating Party.

Feb. 21—Patriotic Dance at High School.

Feb. 22—Dr. Grenfell addresses Canadian Club at Union.

ECHOES FROM THE MEDICAL DINNER.

"The States are in this war to a man."—Dr. Porter.

"And among our anxieties — are those as to what we shall eat and what we shall drink — as to what you shall drink — these promise to be very much curtailed next year."—Dr. W. W. Chipman.

"The prayer of my colleagues, as well as myself is that you will all graduate two months hence. I would ask each one of you to do what you can to answer that prayer."—Dr. W. W. Chipman.

"You cannot do better than follow the old precept, Asquire early a habit of kindness to the sick."—Dr. W. W. Chipman.

"For John McCrae was a keen student, a kind physician—and above all, he was a MAN."—Dr. W. W. Chipman.

"The efforts and degree of success with which a Faculty strives to overcome the recognized defects in our preliminary training must to a large extent determine its status as an institution for the teaching of the Medical Sciences."—R. H. MacLauchlan.

"For they have taught our young minds how to shoot—and the accuracy of our marksmanship will be evidenced—by our knowledge as diagnosticians, and our skill, with the scalpel rather than with the sword or the bayonet."—R. H. MacLauchlan.

"The duty of a faculty is to teach and train young men for the great work before them—and to conduct research."—Acting-Dean Dr. Blackader.

"And I am sure that when you go out—you will not fail in your obvious duty, and that you will maintain and add to the reputation of Old McGill."—Acting-Dean Dr. Blackader.

"Those of us who must remain at home to carry on the work here, do envy you. I am sure you will not fail in your obvious duty."—Dr. Evans.

J. C. W., '19.

A YEAR AGO TO-DAY.

Harvard defeated McGill in Boston to the tune of 4—0. 5,000 people saw the International hockey match.

Students paraded to McGill-Laval hockey game. Students' Council gave Smoker at Union after the game.

Murray Brooks spoke to the Sunday Sing at Strathcona Hall

Sir Melbourne Tait, Law '62, former Chief Justice of Quebec, died suddenly of heart failure.

THE HOUSE OF QUALITY (REGISTERED)

Special Announcement For February Fur Selling

We still have $300,000 worth of Furs in stock that were made to sell this season—and we are going to sell them.

Notwithstanding the enormous advances in raw skins which the St. Louis and New York Fur Sales show — advances which run from a minimum of 10% to a maximum of 100% —it is our intention to adhere to our usual policy of selling all manufactured furs during the present season—rather than **to carry them over and sell at higher prices next season. This means $300,000 worth of Furs at cost price.**

The unusual amount of our stock assures splendid assortments from which to choose — and the Fairweather guarantee applies to style as well as quality.

JEST TALK
—By Jello

MODIFIED PACIFISM.

First One: I hear your son, Eb, at college, is opposed to the draft.

Second One: Well!, he does say that he'd rather have it in cash.

I got the swellest pair of feet
That ever were completed,
And with this understanding,
I have never been de-feeted.

BY GUM!

There is a girl in History class who chews her gum; she chews it all the hour long, until her jaws are numb. No matter on what day it is, she always has it there; if she would but forget it once, I'm sure no one would care. I feel I must gaze at her, I cannot look away; and when I'm asked a question, I just flunk it every day. For when my thoughts have wandered up until they get quite high, I see her moving face again, they tumble from on high! And even if I do not see, I hear her all the same; I know that I'll not pass the course, and feel that she's to blame.

HOPEFUL WAITING.

Eb: When does your father come home?

Edith: Just wait ten minutes, and you'll feel his fingers in your hair.

HIGH FINANCE.

A stranger stopped a newsboy saying: "See here son, I want to find the Montreal Bank. I'll give you half a dollar if you direct me to it."

With a grin the boy replied: "All right, come along," and he led the man to a building a half-block away.

The man paid the promised fee, remarking, however, "That was a half-dollar easily earned."

"Sure!" responded the lad. "But you mustn't fergit that bank directors is paid high in Mawn-treal."

"What is ground hog?" the teacher asked,
And Willie volunteered—
"Ground hog is sausage," was what she heard,
And then she disappeared.

A picture no artist can paint—the colored porter shovelling coal on one of our lightless nights.

REGULAR RATES.

Traveller: "How much is my bill?"
Clerk: "What room?"
Traveller: "I slept on the billiard table."
Clerk: "Fifty cents an hour."

WAR WORK IN METALLURGY.

The Daily is indebted to Prof. Alfred Stansfield, of the Department of Metallurgy, for the following article, which concerns the meeting of the Montreal Metallurgical Society to be held on Wednesday evening in the Macdonald Chemistry Building.

It has often been pointed out that victory in the war depends on the workers at home as well as on the armies in the field. Those who are not in the firing line must support our soldiers at the front with arms, aeroplanes and ammunition, besides making good the deficiency in food and other supplies that is caused by the war. For the efficient conduct of these industries Canadians are learning the fundamental importance of the chemical and metallurgical industries, to which in the past far too little attention had been paid in this country. We are learning also the importance to Canada of a body of workers who have a thorough scientific knowledge of the various branches of these industries. Such workers should be furnished by McGill, and one object of these remarks is to advise men who are taking work in Metallurgy, Mechanical Engineering or allied subjects, not to neglect the opportunities that are offered them for getting in touch with the problems that present themselves in the metallurgical industry, and with the workers who are now occupied in meeting these problems. Acquaintance with the larger problems in Canadian metallurgy can be gained by attending the meeting of the Canadian Mining Institute, early in March, at which there will be a special Metallurgical session, but it is perhaps not generally realized to what an extent Montreal has become a metallurgical centre in recent years, and that we have in this city an efficient metallurgical association for studying the various problems that present themselves to the workers in munitions, steel making and similar occupations. McGill students are of course fully occupied in preparing themselves for those necessary evils, examinations, but any student of metallurgy would find that attending the monthly meetings of the Montreal Metallurgical Association would widen his point of view, and add great-

R. J. Tooke English Socks, 35c.

Semi-ready Tailoring

It's for Men who like "Nice Stuff"

The best tailor in Canada cannot tailor clothes any better than Semi-ready Tailoring.

Every stitch is true—every curve and design is artistic—the patterns are chosen by men of good taste—and the fit and finish precisely right.

Price is a great consideration—the wool shortage makes it so—Semi-ready Clothes have the price in the pocket—and the increase in cost has been small compared with the usual price inflation.

$18 Semi-ready Suits are worthy.
$20 Semi-ready Suits are better.
$25, $30 and $35 Suits are excellent.
$40 and $50 Suits are exclusive.

If we have not what you want ready to try-on we can make you a Suit to Special Order from any one of 500 patterns. Prompt delivery.
